

### **IMPORTANT NOTE**

Our D Bit mouth width is the measurement between the rings and not the actual length of the mouth piece itself.

Don't have too tight a fit. You should always leave a little room each side for comfort. It is common for 1/4" each side of your horses mouth.

### **IMPORTANT NOTE**

Our Dutch Gag mouth width is the measurement between the cheek pieces and not the actual length of the mouth piece itself.

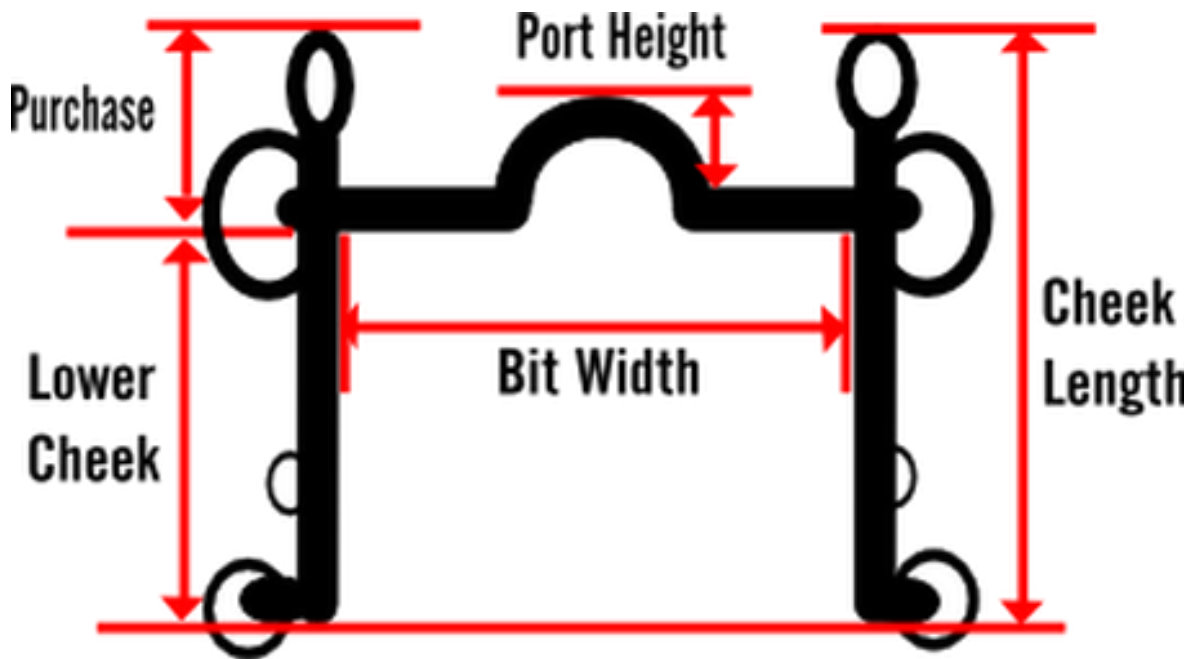

Don't have too tight a fit. You should always leave a little room each side for comfort. It is common for 1/4" each side of your horses mouth.

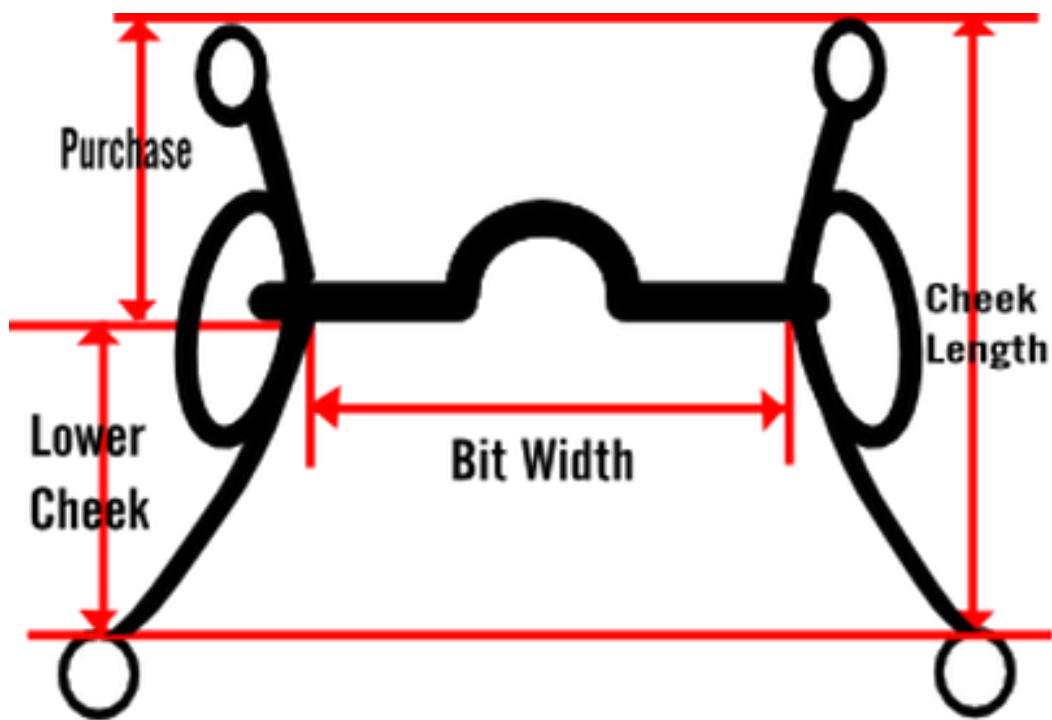

### **IMPORTANT NOTE**

Our Eggbutt mouth width is the measurement between the Ring pieces and not the actual length of the mouth piece itself.

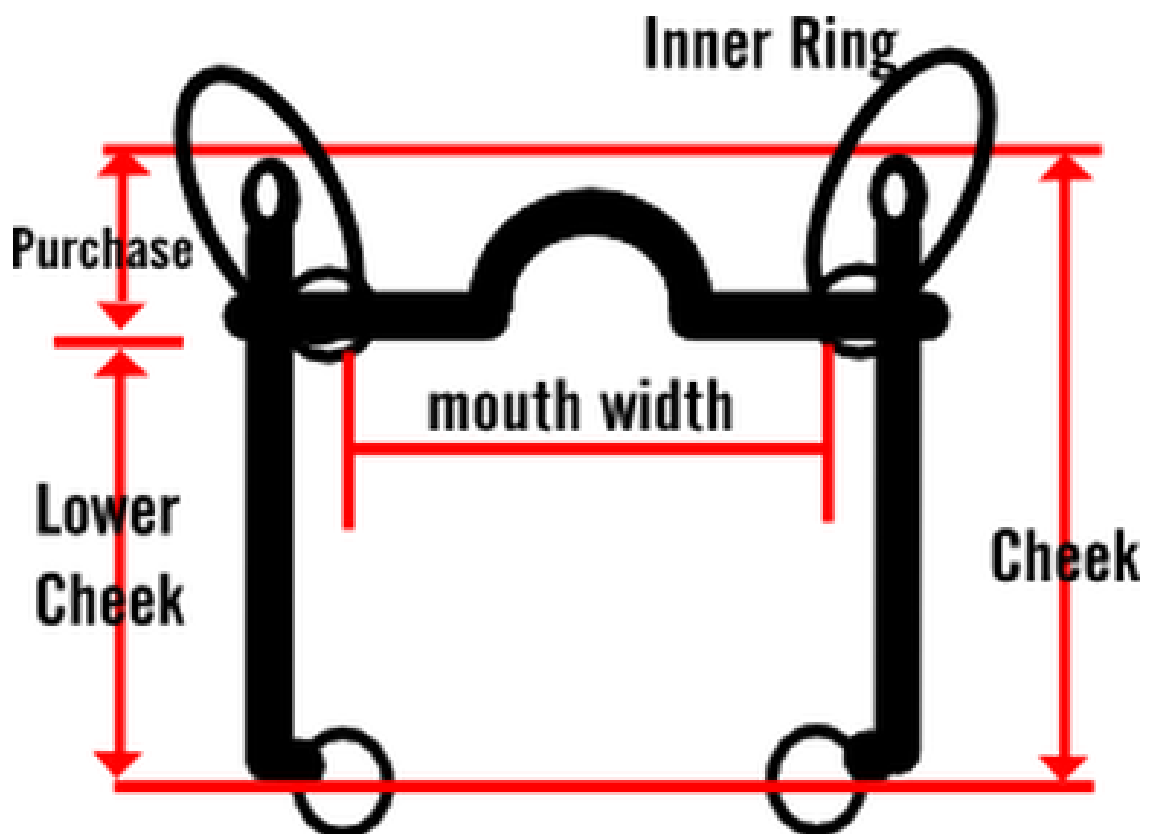

Don't have too tight a fit. You should always leave a little room each side for comfort. It is common for 1/4" each side of your horses mouth.

### **IMPORTANT NOTE**

You can specify your required bit width or length of the mouthpiece in inches and fractions of an inch. e.g. Bit Width 6" + Bit Width Fraction 3/4" will give you a width of 6 3/4"  
Our American Gags come with a cheek length of 8.5" as standard. You can request different lengths by contacting us.

### **IMPORTANT NOTE**

Our Butterfly Flip Bits mouth width is the measurement between the cheeks and not the actual length of the mouth piece itself.

Don't have too tight a fit. You should always leave a little room each side for comfort. It is common for 1/4" each side of your horses mouth.
